Profile

Computer Science undergraduate with a strong foundation in programming, data structures, algorithms, and software development principles. Skilled in Object-Oriented Programming (OOP) and experienced in developing full-stack web and mobile applications through academic and personal projects. Proficient in both front-end and back-end technologies, with hands-on experience building e-commerce systems, responsive user interfaces, RESTful APIs, and Android applications. A proactive and adaptable learner with strong logical thinking, problem-solving, and analytical skills, committed to delivering user-focused solutions while collaborating effectively in team environments and continuously exploring new technologies.

Education

BSc (Hons) Computer Science (Top-up), *University of Bedfordshire*

Expected Intake: September 2026

Higher Diploma in Information Technology, *SLIIT City Uni*

2024 – Present

Currently in Year 2, Semester 2, with final results pending.

Foundation Certificate in Information Technology, *SLIIT City Uni*

2023 – 2024

Built a foundation in programming, databases, networking, and core IT concepts.

G.C.E. Ordinary Level, *Ashoka College - Horana*

2022 (2023)

Completed Successfully in English Medium.

Python for Beginners (E- Certificate), *University of Moratuwa*

Mar 2026 – Jun 2026

Covered Python fundamentals and software development basics.

Full Stack Development Course (E-Certificate), *University of Moratuwa*

May 2026 – Jun 2026

Learned front-end and back-end development, databases, and modern web technologies.

Awards

Dean's List Award, *SLIIT City Uni*

12/2025

- Awarded for achieving the highest academic performance in Year 1 Semester 2 (Y1S2), recognizing outstanding academic excellence, consistency, and strong performance across all academic modules.

Academic Projects

LUMEERUP – AI-Powered Career Guidance Platform

- Built an AI career guidance platform that gives personalized career suggestions using user skills, interests, education, and resume.
- Added features like login, skill tests, resume upload, career recommendations, and learning plans.
- Designed a PostgreSQL database and built APIs to manage users, assessments, and recommendations.
- Built with Next.js, TypeScript, Tailwind CSS, PostgreSQL, Prisma, and OpenAI API.
- Deployed the application using Vercel for live hosting.
- Technologies: Next.js, TypeScript, Tailwind CSS, PostgreSQL, Prisma, OpenAI API, Git, GitHub, Vercel

Petpalz - E-Commerce Website

- Built an e-commerce website for pet accessories with product listings and categories.
- Developed admin panel to manage products and inventory.
- Created a simple and user-friendly shopping interface.
- Technologies: PHP, MySQL, JavaScript, HTML, CSS, WAMP Server

ShipMate Logistics System

- Built an offline logistics management system for shipment tracking and driver management using Java and SQLite.
- Developed core features to manage drivers, shipments, and local data storage efficiently.
- Created simple reports to help improve logistics workflow and decision-making.
- Ensured reliable offline data handling with local database synchronization for smooth system performance.
- Applied Object-Oriented Programming (OOP) to keep the system clean, organized, and easy to maintain.

Readify & FilmFolio Apps

- Developed Android apps for book exploration and media browsing using Java/Kotlin, Firebase, and XML.
- Built Readify, a cloud-based book discovery app with real-time data sync using Firebase.
- Created FilmFolio, a media browsing app with modern UI components and local storage support.
- Designed responsive, user-friendly interfaces and integrated Firebase for real-time updates and cloud data management.

Ammehula Smart Dining Ecosystem

- Developed a real-time restaurant operations system using Next.js, Node.js, PostgreSQL, Socket.io [🔗](#), and Docker for managing orders and kitchen workflows.
- Built a Kitchen Display System (KDS) with real-time order updates and smart routing between kitchen and bar stations.
- Created a Kanban-style order tracking system to monitor preparation, cooking, and delivery stages efficiently.
- Designed quality control tools and performance reports to improve food consistency and kitchen efficiency.

Skills

Frontend Development

React.js, Next.js, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap

Database Technologies

Firebase, MongoDB, Mongoose, MySQL, PostgreSQL, JSONbased data handling, Prisma ORM

Specialized Tools /IDEs

VS Code, NetBeans, Android Studio, IntelliJ, PowerBI, Figma, WAMP Server, Postman, Selenium/ Cypress

Languages

English , Sinhala

Backend Development

Next.js,Node.js, Express.js, Python,PHP, REST APIs

Version Control

Git, GitHub

Authentication & Security

JWT, bcrypt, NextAuth.js

AI-Assisted Development

Cursor, Antigravity

Personal Attributes

- Strong problem-solving and analytical skills
- Good teamwork and collaboration skills
- Quick learner and adaptable to new technologies
- Creative thinking with attention to detail and code quality
